***IN STOCK, AVAILABLE NOW!***

FiTech Fuel Injection is proud to introduce our all-new line of inverted cone air filters. Our dry flow filters are made from a black synthetic filter media which results in excellent filtration.

These air filters are washable and reusable with oil free maintenance. Capped on both ends with a show quality chrome housing and a heavy-duty clamp to secure your filter.

We now offer conical air filters in 6 to 9 inches in height with a 4 inch inlet (92mm throttle body) or 4 ½ inch inlet (102mm throttle body).

### Features & Benefits

- High air flow with excellent filtration
- Black synthetic filter media
- Oil-free air filter
- Washable and reusable
- Round tapered design
